

2Source Manufacturing Inc. Signs License Agreement with Boeing to Manufacture and Sell Airplane Spare Parts

Toronto, May 23, 2008 -- 2Source Manufacturing Inc. today announced that it has entered into a data license with The Boeing Company allowing the use of its detailed engineering designs to obtain Parts Manufacturing Authority (PMA) for replacement spare parts.

2Source CEO Robert Glegg said, "This license is strategically significant to 2Source, as it will permit us to manufacture licensed PMA parts under our FAA approved quality system and distribute directly and globally to major aircraft operators."

2Source has been licensed to manufacture brake and axle sleeves and sell them to operators and other customers worldwide. These products are used on the Boeing 737, 747, 757, 767 and 777 airplane models.

About 2Source

2Source Manufacturing Inc. is a leading AS9100 certified producer and approved supplier of precision machined aircraft bushings and similar parts for aircraft landing gears, nacelles, flight surfaces and controls. The fast-growing company supplies to major aerospace customers in North America, Europe and Asia. Based in Mississauga, Ontario, 2Source has the value-added engineering services, comprehensive expertise and state-of-the-art equipment to meet all of its customers' aircraft bushing needs. The company is exceptionally dedicated to lean manufacturing and continuous improvement, customization, world-class quality, competitive pricing and guaranteed delivery.
